## PROFESSIONAL SUMMARY

Junior Software Engineer with 1+ year of production experience building scalable fintech web applications using React.js, TypeScript, and REST APIs. Proven track record delivering secure, role-based interfaces for transaction-heavy systems, with cross-functional collaboration across backend and design teams.

## TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, TanStack Query, Redux, Context API
- **Backend & Data:** Node.js, Express.js, MongoDB, MySQL, RESTful API
- **Languages:** C++, JavaScript, TypeScript
- **Design & Animation:** GSAP, Framer Motion, Figma

## PROFESSIONAL EXPERIENCE

### Junior Software Engineer

*Mintifi, Mumbai*

**June 2025 – Present**

- **Customer App**
  - Built and maintained 10+ reusable React.js components for core customer onboarding and loan management workflows, reducing UI inconsistencies and accelerating feature delivery across the Customer App.
  - Optimized React component rendering and lazy-loaded non-critical assets, reducing initial page load time by 30% in high-transaction dashboard views.
  - Implemented 3 new loan offer modules with finance-configurable eligibility logic, delivering personalized loan recommendations to 10,000+ active customers.
- **Template Manager App**
  - Built a production-grade template management system using React 19, TypeScript, Redux Toolkit, TipTap, and Tailwind enabling contract creation, editing, versioning, and publishing across multiple business teams.
  - Developed a multi-page rich text editor with advanced formatting, tables, images, building blocks, variables, comments, and version restore, significantly reducing manual document preparation time.
  - Implemented PDF export pipeline, role-based template lifecycle (Create → Draft → Publish), and a dynamic dashboard with filters, inline actions, and API-driven state synchronization.
- **Transaction App**
  - Integrated QR-based invoice scanning using Invoice APIs, enabling automated data extraction for invoice workflows and reducing manual data entry errors in DDR and deferred payment processes.
  - Implemented role-based authentication with dual verification options — security Question/Answer or Time-based One-Time Password (TOTP) — allowing users to select their preferred second-factor authentication method.

## PROJECTS

### Imagify [<https://imagify-frontend-hcjl.onrender.com/>]

*MERN Stack, JWT, Framer Motion, GSAP*

- Imagify is a full-stack MERN web application featuring JWT-based authentication, role-based admin access, and real-time usage analytics — built with production-grade REST API design and deployed publicly.
- Implemented JWT-based authentication with encrypted user sessions and role-based access control for admin dashboard to monitor platform usage and manage logs
- Implemented fluid UI animations and responsive layouts using Framer Motion and GSAP, resulting in a polished user experience across mobile and desktop viewports.

## EDUCATION

### Bachelor of Technology (B.Tech) in Information Technology

**Aug 2022 – Jun 2025**

Bankura Unnayani Institute of Engineering, Bankura, West Bengal

**CGPA - 8.29/10**

## COMPETITIVE PROGRAMMING PROFILES

- **LeetCode** (<https://leetcode.com/u/RahulScripted/>)  
Problems Solved: 388 | Rating: 1709 | Highest Rating: 1712
- **CodeChef** ([https://www.codechef.com/users/explosion\\_king](https://www.codechef.com/users/explosion_king))  
Rating: 3Star (Highest Rating: 1689) | Division 2
- **GeeksforGeeks** (<https://www.geeksforgeeks.org/profile/goswamirap9x6>)  
Problems Solved: 329 | Institute Rank: 1
