PROFESSIONAL SUMMARY

Software Engineer with production experience in fintech systems handling customer workflows, transactions, and role-based access control. Strong backend focus with Node.js, Express, SQL, and MongoDB, experienced in designing secure REST APIs, ensuring data consistency, and maintaining 99.5%+ uptime in high-availability environments. Comfortable with DSA, system design fundamentals, and performance optimization.

TECHNICAL SKILLS

- **Backend & Data:** Node.js, Express.js, MongoDB, MySQL, RESTful API Design, JWT Authentication, Postman
- **Frontend:** React.js, Next.js, Tailwind CSS
- **Languages:** JavaScript, TypeScript, C++
- **Design & Animation:** GSAP, Framer, Figma
- **Engineering Fundamentals:** Data Structures & Algorithms, System Design Basics, Application Security, Performance Optimization
- **Tools & Practices:** Git, GitHub, Agile/Scrum, Forgejo

PROFESSIONAL EXPERIENCE

Junior Software Engineer *Mintifi, Mumbai* **June 2025 – Present**

- **Customer App**
 - Developed and maintained scalable, production-grade web application supporting core fintech customer workflows with high availability and reliability
 - Designed and owned RESTful APIs using Node.js and Express.js for fintech workflows involving customer onboarding and transaction processing, with secure JWT-based authentication and role-based access control.
- **Customer 360 App**
 - Implemented authentication and role-based access control (RBAC) using JWT, ensuring secure, role-specific access aligned with industry best practices
 - Monitored and optimized production systems supporting fintech customer workflows, proactively identifying performance bottlenecks and contributing to 99.5% uptime across critical applications
 - Collaborated with cross-functional teams in an Agile environment, participating in code reviews, debugging production issues, and improving overall code quality
- **Transaction App**
 - Implemented multiple UI enhancements and validation improvements, including Flexi TL UI changes, consolidated transaction lists, and DDR UI validation
 - Integrated QR-based invoice reading using Invoice APIs and enhanced invoice workflows, including deferred invoice handling, invoice source fixes, and invoice edit support
 - Diagnosed and fixed critical production issues impacting invoice and transaction data integrity, including null invoice source handling and deferred invoice updates, ensuring correctness in financial records

KEY PROJECTS & ACHIEVEMENTS

- Imagify** [\[Link\]](#) *MERN Stack, JWT, Chart.js, Framer Motion, GSAP*
- Designed and built a production-grade MERN application with secure JWT authentication, role-based admin access, real-time analytics, and performance-optimized frontend, following industry-standard REST API and security practices
 - Implemented JWT-based authentication with encrypted user sessions and role-based access control for admin dashboard to monitor platform usage and manage logs
 - Built real-time data visualization using Chart.js to track usage trends and enhancement statistics, enabling data-driven insights for platform optimization
 - Created smooth UI animations and responsive layouts using Framer Motion, GSAP, and Tailwind CSS, improving user engagement by 80%
 - Designed and developed an interactive offline-accessible game "Escape Mage" to enhance user engagement during downtime periods

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology **August 2022 – June 2025**
Bankura Unnayani Institute of Engineering, Bankura, West Bengal
